

# HL 700

## Safety pillar

The HL700 safety post can only be used as personal protective equipment, protecting the worker against falling from height. It provides protection for up to 3 people and is designed for installation on trapezoidal sheets with a thickness of at least 0.5 and concrete structures.

### SPECIAL FEATURES

### PARAMETERS

Material	stainless steel
Dimensions	513 x 415 x 375 mm
Weight	3.5 kg
Static strength	14 kN
Bore diameter of the catch point Ø	45 mm
Spacing max.	340 mm

Max. number of users	3
----------------------	---

### POST

Height variants	500 mm
Material	stainless steel

### VARIANTS

ref. no.	version	mounting type
HL700 101	anchor point + mounting kit for trapezoidal sheet metal	5x25
HL700 102	anchor point + mounting kit for trapezoidal sheet metal	7x34
HL700 103	anchorage point + concrete assembly kit	Kotwa segmentowa HST2 M12x115/20
